

The Person You're Begging to Notice Isn't the *Problem*

A ten-minute audit of who actually shows up for you — so you stop chasing silence and start noticing the people already choosing you.

NAME

DATE

MESSAGE RATIO

1 Count the Messages

- Open a thread with someone you're **chasing**. Count your messages vs. theirs — write the ratio down.
- Open a thread with someone who asked about your week **twice** and got no reply. When did you last answer them?
- Name the feeling the first person's silence gives you. Is it really excitement — or *anxiety* wearing a costume?
- Name one unremarkable thing the second person did for you — the thing you brushed right past.

MESSAGE COUNT

2 Check If It's Them or the Chase

- Recall an unavailable person who suddenly became available. Did your interest survive more than a few weeks?
- Write what you're actually chasing in **one sentence** — their company, or the moment they finally text back?
- Name the *open loop* — the exact question their silence keeps leaving unanswered in your head.
- If they replied warmly to everything tomorrow, what would you even talk about? A blank answer *is* the answer.

THEM VS. THE CHASE

3 Find the Boring, Reliable Ones

- List two or three people who showed up for something **inconvenient** without being asked.
- For each: when did you last give them your **full** attention instead of a distracted reply?
- Pick one person you're unsure about. Watch what they *do* over the next month — not what they say.
- Name one thing you could do this week that matches their effort, not just a thank-you text.

WHO SHOWED UP

4 Find the Role You're Auditioning People For

- Cut off an unavailable person before, then found the **same dynamic** again within months? Name the pattern.
- Whose approval currently feels like it would *prove* something about you? Write down exactly what.
- Why does love from people who already love you feel like it "doesn't count"? Trace that back.
- Name one place you already get real evidence of your worth — with nobody's approval attached.

WHOSE APPROVAL COUNTS
